

Action Pave[®] Acrylic Coatings

Quality, Performance,
and Value Never Looked So Good.
The Action Pave Advantage.

Action Pave Acrylic Coatings by Crafc
are formulated for use in all environmental
conditions creating long lasting surfaces
that are designed for performance.

Any professional will tell you that the performance of an acrylic coating is not based solely on the finished product, but how well the material performs before during and after the installation. Action Pave Acrylic Coatings are made with 100% acrylic resins, mineral fillers and reinforcing color-fast pigments that have been optimized for both the ease of installation and long-term performance. The Action Pave Acrylic Coatings mixing and suspension qualities allow for uniformity of mix design across any size project ensuring color and aggregates are evenly dispersed for the highest quality finished product.

Formulated for both asphalt and concrete surfaces, Action Pave Acrylic Coatings provide enhanced UV protection, vibrant color options, and a level of durability that is unmatched. When it comes to selecting a coating— performance really is everything.

Quality, performance and value it's what we put into every gallon of Action Pave since 1974.

Manufactured in the USA by Crafc Inc.

Feature

Benefit

Acrylic/Latex Emulsion Coating	Provides strong chemical and mechanical bonding to substrates and between layers creating a durable high performance.
Excellent Mixing & Suspension	Stable color and aggregate dispersion ensures uniformity of coatings over large areas and ease of installation.
High Material Coverage Rates	Lower material costs.
UV Stabilized	Long lasting vibrant colors.
EFT-Enhanced Filler Technology	Increases the impact resistance and toughens the playing surface to provide excellent long term structural performance of the Action Pave coatings.
Designed for Asphalt and Concrete	Reduces inventory requirements. Does not require structural reinforcement materials.
Hard & Cushion Surface Formulations	Action Pave Coatings meet and exceed most customer surfacing requirements.
Custom Colors Available	Allows for unique surface design and graphic options.
ITF Certified	Certified by ITF for speed of play.
